

Statement of Qualifications

Suburban Rails has been designing and building custom ramps and skateparks since 1984. Our design and construction teams are made up of experienced skateboarders, inline skaters and bikers who understand the specific needs of the riders and take great pride in their work. Our designs are customized to the wishes and needs of local skaters with consideration to flow, appropriate transitions, spacing and budget. Wood framed construction is to the highest standards, requiring little or no maintenance.

We feel that all previous clients are good references and encourage you to call them. A partial list is provided below. If additional contacts are needed please let us know.

Suburban Rails carries all necessary insurance, including workman's comp, general and auto liability, finished product liability, and bonding is available.

Who we are

Jeremy Stump, co-owner, designer, draftsman, builder

Background - Skateboarder for over 15 years. Joined Suburban Rails in 1997.

Education - A.A. Degree - Drafting/Design, Hocking College, 1997.

Responsibilities at Suburban Rails include communicating with local skaters, design, layout and construction details in CAD for skateparks, and construction of wood framed skateparks.

James O'Loughlin, co-owner, designer, consultant

Background - Skateboarder for 25 years. Joined Suburban Rails in 2001. Owned Skateboard shop for 4 years.

Education - B.A. Degree - Art and Art Education - Miami University Oxford, Ohio –1996

Responsibilities at Suburban Rails include park design, consulting, marketing, accounting, web-manager and day to day operations.

Sean O'Loughlin designer, consultant

Background - Skateboarder for over 20 years. Numerous contest wins and skateboard magazine articles. Sean is currently the Director of U.C. Berkeley Youth Skateboard Camp.

Private back yard mini-ramp / street elements constructed for ABC television.

Accord, New York (Winter 2005/2006)

9,500 square foot private indoor skatepark street hubbas, stairs, hips, step up gaps and a hipped mini ramp

Terry and Len Bernardo (845) 626-0151

Atlanta, Georgia (Summer 2001)

12,000 square foot private indoor skatepark / "L" shaped bowl, mini-ramp and two street courses. Chad Copp, owner of Wicked Grind (770) 960-3798 www.wickedgrind.com

"By the way, Jeremy Stump's company - Suburban Rails [888.sk8.park] - does a really good job. While we haven't been to Wicked, we did ride Rampage in MA and it was great for it's size. They know good coping, flow, trannie, etc. - that's more than I can say for a lot of builders. I think you can expect some great rides from them in parks to come." - Sk8ParkList.com

Austin, Texas (Winter 2002)

8,000 square foot private indoor skatepark / spined mini ramp and multi leveled street course.

Mike DeLaval, owner of Shred Shed (832) 816-4451 www.theshredshed.com

Columbia South Carolina Plex Indoor Sports (Fall 2004)

9,000 square foot indoor/private skatepark

Sharon Farnham, <http://plexIndoorSports.com>

"James, Jeremy and the rest of the Suburban Rails team were the most talented and professional group of guys I've ever worked with. Their skatepark design abilities were nothing short of perfection as well as their work ethics and efforts on site. We built an 86,000 sq foot Indoor Sports Facility with the best Indoor Skatepark in all of South Carolina - thanks to the Suburban Rails Team. We did extensive research to find the best Indoor skatepark designers/builders in the U.S. and Suburban Rails executed everything they promised and more and completed it on time. I would highly recommend this team for your next Skatepark Project."
